南寶國際生技成立於1975年，於南台灣設置第一座清淨藍藻培植廠。南寶國際生技 藍藻之父 出生於台南的南寶集團創辦人 黃堂慶雲博士，其父為台南地區頗負盛名的中醫師，然而他並沒有接下父親的衣鉢，目的就是希望能透過現代化的技術，來造福更多的人群。

黃堂慶雲博士與微生物學專家東京大學名譽教授渡邊博博士的言談中，發現了文獻中所記載至遠古時代即有的生物-藍藻，含有豐富的營養價值，在幾經尋覓後，發現自己生長的故鄉-台灣台南，是培育藍藻的絕佳場所，因而開闢了他與藍藻的不解之緣，進而展開藍藻的培養研究及開發。至今在南寶生技團隊的努力下，藍藻生產技術已經從1cc的培養，到現在專業量產，藍藻品質更是獲獎無數，並且取得多項國際化專業認證，邁向國際的新趨勢。

Nan Pao International Biotech. Co., Ltd. was established in 1975, and was the first spirulina farm in Southern Taiwan. Nan Pao International Biotech. Co., Ltd., the father of spirulina Dr. Qingyun Huangtang is the founder of Nan Pao International Biotech. Co., Ltd. He was born in Tainan and his father was a famous local Traditional Chinese Medicine doctor. However, instead of following in his father's footsteps, Dr. Qingyun Huangtang aimed to benefit more people through modernized techniques. Dr. Qingyun Huangtang discovered an ancient organism - spirulina, possessing abundant nutritional value, in references when he was talking to an Emeritus Professor of Tokyo University, Dr. Atsushi Watanabe, who was also a microbiologist. After doing some research, he found that his hometown, Tainan, Taiwan, provided a perfect spirulina cultivation environment. Thereafter, his life began to be closely linked with spirulina; he began to develop and study spirulina cultivation. Under the effort of the Nan Pao Biotech team, the original 1 c.c. spirulina culture is now available as a result of professional production technology. Countless awards have been received for the spirulina quality and international accreditations are being processed. The spirulina production technology is heading overseas as a part of this new trend.
